CONSTRUCTION SOFTWARE

Management and Inspection Software
Solutions Tailored to Individual Client Needs
Government and Fortune 500 Clientele

Mobile/Tablets – Apple (iPad, iPhone), Android, Windows
Cloud – Data storage/analysis/reporting
Tablets are quickly replacing clipboards and laptops in many industries. Here’s why we think tablets are the best hardware choice:

- **$ Savings** – Lower tech support costs than laptops, and more efficient than clipboards
- **Quality** – Better legibility than clipboards, and more accurate than laptops since info is typed when observed
- **Reliability** – Tablets work. They are more rugged than laptops and have fewer virus/tech issues
- **Time** – Instant boot up, no double entry, no hand note transcribing, use on the spot
- **Use anytime** – Native apps work where there is no web connection*
- **Use anywhere** – Type, photograph, complete reports, etc., all while carrying a lightweight tablet
- **Tech** – Avoid boundaries of outdated laptop technology
- **Fun!** – Better employee satisfaction, enthusiasm, and retention

* Some advanced features utilizing server data will require a connection to the internet.
Our software is robust and flexible, so it can be tailored to your unique inspection needs and preferences. Versions include:

- Bridge Inspection
- Building Inspection
- Punch Lists
- Construction Administration
- Property
- Other
  - Vehicle
  - Health
  - Client Specific/Custom
When thinking about how to tailor an Inspect2GO app for your needs, consider the common features we offer:

- **Intuitive to use**
- **Document**
  - Take photos and associate them with a specific check-point
  - Note issues and corrective actions or select from a pull-down menu
- **Keep track of scoring as you go**
- **Can be used as a training tool**
- **Native application**

*Some advanced features utilizing server data will require a connection to the internet.*

*This document contains confidential, trade secret, proprietary information of Inspect2GO, Inc. Recipient agrees not to disclose information contained herein beyond members of recipient’s organization. This sales presentation includes standard, custom, and upcoming capabilities. For your specific software specifications, refer to your Inspect2GO Contract.*
Finishing the Inspection

- Onscreen signature capture
- Print a hard copy
  - Utilize a mobile printer on site
  - Back at the office
- Send PDF via E-mail
  - Save on paper & ink
- Sync to server
  - Cloud or your internal server
  - Document management
  - Create permissions before sync
  - Make available to everyone that needs access instantly, and no one that shouldn’t have access
Output the report of your choice. Just give us the template, and we will do the rest.

- Match your existing format
- Eliminate double data entry
- **Accuracy**
  - Eliminate handwriting, transcription, and lost paperwork errors
- Paperless option
- Permanent, searchable record keeping
- List of violations
- Weighted scoring
- With or without pictures

---

**Punch List**

**Date:** 7/11/2012  
**Time of Inspection:** 9:23 AM
**Project:** 5252 Elway Dr.  
**Address:** 5252 Elway Dr.  
**Inspector:** Anthony Weinstein  
**Permit Number:** 0263072011

Required: Install light fixtures.

**Room 105**

Preferred: Repaint wall using the following specification: Sherwin Williams Duration SW2566

**Room 117**

Required: Install specified door.

---

**Architect’S Signature:** [Redacted]

**Contractor’S Signature:** [Redacted]

With your signature, you certify that you have received a copy, either by email or hard copy, of this inspector’s report. You further certify that the architect has inspected and you understand the work to be performed is included herein, and will implement all corrective actions needed within the time period allotted.
Our document management system allows you to get the files you need to the right people, paper free.

- Access through any web browser on any device or computer
- Three permission levels
  - Administrator
  - Manager
  - Viewer
- Administration
  - Manage user and client accounts
- Documents
  - Add, remove, edit, and view files based on your user permissions
  - Printable file log showing who viewed and edited the file, and when
  - Permission settings let you control who is able to view and edit your file or folder
Three user permission levels, so your people can do everything they need, and nothing they don’t.

- **Administrator**
  - Can add, edit, or remove
  - Users
  - Project folders
  - Files

- **Manager**
  - View, print, and approve files within permitted project folders

- **Viewer abilities**
  - View or download folders and files if permission is given
Stay on top of your workflow and easily find a project with our search function.

- Find it in seconds
  - Search by one or more fields to quickly get to the project/s you are looking for.
- Links
  - View a file directly, or go to the project folder with one click

The file browser is where anyone with a username interacts with the files. This is what an Administrator might see:

- **Info at a glance**
  - Project number
  - Project name
  - File size
  - Report status

- **File interactions**
  - View, print, change status, and more
  - Available interactions are dependent on your permission level

- **File Log**
  - Keep track of who is doing what to the file

- **User access**
  - Know who has access to the file
